

## Hub Promotional Group Product Safety Statement

California Proposition 65 (Prop 65) is the Safe Drinking Water and Toxic Enforcement Act of 1986 published as Section 25249.7 of California's Health and Safety Code. Proposition 65 is intended to warn consumers of potential exposures to chemicals that are recognized by the State of California as carcinogens and reproductive toxins. Prop 65 applies to all consumer goods sold within the state and impacts all importers, domestic manufacturers, and retailers of these items

Hub Promotional group maintains its own Hub Safety Protocol™ program to inspect and thoroughly test all products to make sure they comply with California's Proposition 65 and all other national safety standards. To ensure compliance with the Hub Safety Protocol, Hub Promotional Group requires that its products demonstrate - via testing by an independent accredited analytical laboratory - that they comply with both the California Proposition 65 exposure standard as well as the Federal Consumer Product Safety Commission's toughest requirements. Through our vigorous enforcement of the Hub Safety Protocol™, Hub Promotional Group pledges to ensure compliance with California's Proposition 65 as well as all relevant national safety standards to protect our customers.

Safety sheets and supporting documentations are readily available for all products upon request. As part of our rigorous quality program, we keep and maintain detailed quality records throughout our entire supply chain. This starts with inspections at our oversea factory by qualified audit team in China. We also set up third-party factory audits for both social and quality compliance on a regular basis. At least on a bi-annual basis, Hub Pen team from the United States conduct on site audit of our supplier factory to ensure and maintain the highest level of quality and safety for our product.

Thank you

## Testing Methodology

Based on risk assessment of our product and market, an independent accredited analytical laboratory will perform compliance testing on Lead and Phthalates on all active products. Additional chemical such as Cadmium, BPA and other chemicals will be tested as needed.

## Testing Frequency

- All New Products must pass testing by an independent accredited analytical laboratory prior to being released for mass production and sale.
- When an existing product is moved to a new manufacturer, the product will be tested by an independent accredited analytical laboratory before released for mass production and sale.
- All imprint inks and other decorating materials are tested each year.
- Re-Testing Frequency. The frequency of retesting is established based upon the potential risks associated with the product and the sales volume of the product.

We test all colors of all components of all products to all standards that apply.  
Formal Test Reports can be requested thru your sales rep.

## HUB Prop 65 Label

To comply with the new Prop 65 warning regulation effective August 30, 2018. All products manufactured after Aug 15, 2018 that has a Prop 65 listed chemical above exposure limits, will be shipped with the new warning label regardless of its ship to destination.

- Product Label Warning (*Font size 6 or above*)

- Catalog/Website Warnings

Catalog will update with applicable warning for non-compliant products.
